

**The meter replacement project has begun. VEPO is the installation company contracted by the Town of Fishkill for this project. VEPO mailed letters during the week of May 28<sup>th</sup> to Phase 1 residents which covers the Merritt and Brinckeroff water districts. Installation will begin on June 11<sup>th</sup>. Please schedule an appointment with VEPO upon receiving the letter since installation will require you to be home and allow access into the residence. Each installer will have appropriate ID and you will receive notification when the installer is on his way to the appointment if a cell phone number was provided. Installation will take approximately 1-2 hours. In late July, VEPO will mail letters for Phase 2 covering the Beacon Hills, Glenham and Rombout water districts. The expected project completion date is the end of November, before the winter weather. If you have any questions or concerns, please contact the Water Department.**
